PREAMBLE

TO BE READ AT THE 8AM SESSION ONLY !

Welcome to the South Coast Amateur Radio Service. Operating on 7.251 Mhz. This is a directed service net, providing an opportunity for all Amateur Radio Operators, with the proper class license to operate on this frequency, a friendly environment to briefly make contact with other stations, or to pass along informative local weather information.

This net operates from a "CALL LIST" taken by the Net Control Stations. When a Call for Check-ins is made, please give only the suffix of your call when checking in. If your call is not picked up by the Net Control, please be patient, another list will be taken shortly. Those wishing to speak to other individuals checking in, or to pass important information, **WILL** be handled through the Net Control by calling **CONTACT**. Operational procedures and general information may be found at www.southcars.com

This net is in operation everyday from 8am until 1pm; all times are eastern.

Your Net Control for this session is (call sign), (my name is), and I am located in (your QTH), where the current temperature is.....

"Note to NCS: Start your net as outlined in the NCS Operations Manual."
